

## Profile

I am a self-motivated and personable individual who is passionate about the web and user-centered design. I have developed my negotiating and liaison skills working in numerous teams acting as a coordinator, communicator and team leader. I am conscientious, committed to the task in hand, reliable and eager to learn. I have always received positive feedback regarding my ability to be adaptable and co-operative. During case studies I have lead user centered design tests and carried out analyses and reports.

My personal interests include cycling, completing a number of sportifs and completing several Tour de France stages such as the Col du Télégraph, Col du Galibier and Alpe-d'Huez. I'm the web administrator for my football team and play in the Errea Somerset County League. I am an out-going and proactive person and I always believe in bettering myself in the activities I undertake.

## Experience

### Full Time Study

2010 - 2011

To allow myself full commitment to my studies I took a year out of work during my final year at university.

### University of the West of England Technical Assistant (Language Centre)

2008 - 2010

My primary role was to act as a point of call for students studying languages at the university, dealing with various enquiries and situations. I gave presentations to both foreign language students and national students on the facilities available and how best to use them. During this time I was given sole responsibility of the language center, and took pride in the trust given to me.

### University of the West of England Database Management

2008 - 2009

I took up a second post at UWE working under pressured conditions analysing data, and transcribing hand written evaluation surveys.

### Freelance Web Designer Developer and Designer

2007 - present

Web Design has been a long-term hobby of mine of which I found the most enjoyable aspect to be spending time with clients, gathering requirements and achieving results which exceed those of expectation.
